---

## PROFESSIONAL SUMMARY

PHP/Laravel specialist with **10+ years** experience in Vue.js, PHP, and modern web development. Expert in crafting clean, scalable architectures that deliver reliable, production-ready code. Strong background in full-stack integration with React/Vue frontends and AWS cloud infrastructure optimization.

### Key Coding Expertise:

- **Laravel/PHP:** Building robust backends with queues, APIs, and event-driven systems
  - **Vue.js:** Developing responsive UIs with Vue 3, Pinia, and Nuxt.js for seamless user experiences
  - **Full-stack Integration:** React/Vue frontends with Laravel APIs, optimized for AWS via Terraform/Ansible IaC
- 

## TECHNICAL SKILLS

Category	Technologies
Languages	PHP, JavaScript/TypeScript, Python, Golang, SQL
Frameworks	Laravel, React, Vue.js, Node.js, Magento 2
Cloud & DevOps	AWS (EC2, S3, Lambda, ECS), Docker, Terraform, Ansible, GitHub Actions
Databases	MySQL, PostgreSQL, DynamoDB
AI & Tooling	OpenAI SDK, RAG, Grafana, Zabbix, Claude Code

---

## PROFESSIONAL EXPERIENCE

### APPOLY | Backend Developer

*2025 – Present*

Developing high-value client projects for enterprise and SMB clients. Working on scalable Laravel APIs handling significant traffic volumes and implementing modern development practices.

#### **Key Contributions:**

- Building enterprise-grade backend solutions for multiple clients
- Implementing scalable API architectures for high-traffic applications
- Contributing to team coding standards and best practices

### VONEUS | Senior Software Developer

*Jun 2023 – Sep 2025*

#### **Infrastructure & Development:**

- Worked on microservices infrastructure supporting 200+ enterprise clients
- Contributed to deployment optimization reducing release time from 2 hours to 15 minutes with IAC.
- Participated in disaster recovery initiatives achieving 99.95% uptime across critical systems
- Built internal tooling automating workflows, eliminating 20+ hours/week of manual tasks

### GRV MEDIA | Backend Developer

*Jan 2021 – May 2023*

#### **Platform Development:**

- Contributed to scaling analytics platform from 10K to 50,000+ daily active users
- Implemented serverless architecture and CI/CD pipelines enabling 40% faster product launches
- Participated in AWS Lambda migration reducing infrastructure costs by 30%
- Developed event-driven architecture for real-time analytics processing

### IT RETAIL SYSTEMS | Contract Developer

*Jan 2020 – Dec 2020*

#### **Project Delivery:**

- Delivered multiple high-impact projects for retail clients

- Managed AWS infrastructure serving 1M+ monthly transactions
- Maintained system reliability during peak retail seasons

## SO TECHNOLOGY | Backend Developer

Jan 2018 – Dec 2019

### Enterprise Development:

- Worked with distributed team across 3 time zones on complex enterprise e-commerce projects
- Delivered projects on time and within budget while maintaining code quality standards
- Contributed to remote collaboration workflows and development processes

## COLORWAY GRAPHICS | Backend Developer

Jan 2016 – Dec 2017

### System Development:

- Built factory management system processing 1,000+ orders/day (*still in production*)
- Implemented barcode automation reducing order processing errors by 90%
- Designed fault-tolerant architecture ensuring system reliability during production cycles

## DIGITAL SOLUTIONS LTD | Junior Developer

Jan 2015 – Dec 2015

### Foundation Development:

- Promoted to mid-level within 8 months due to strong performance
  - Built RESTful APIs supporting 50+ client applications
  - Established foundation in enterprise-grade development practices
- 

## KEY TECHNICAL ACHIEVEMENTS

### Performance & Scalability

- Contributed to systems scaling from 10K to 50K+ daily users
- Worked on applications handling millions of monthly transactions
- Maintained 99.95%+ uptime across production systems

### DevOps & Automation

- Participated in deployment optimization reducing times by 80%

- Built automation tooling eliminating 20+ hours/week of manual processes
- Implemented Infrastructure as Code reducing configuration errors

### **Cost & Efficiency Optimization**

- Contributed to 30% infrastructure cost reduction through cloud architecture improvements
  - Helped accelerate product delivery timelines by 40% via process optimization
  - Implemented automated monitoring and alerting systems
- 

## **CERTIFICATIONS & STATUS**

-  **AWS Certified**
  -  **UK Citizen**
  -  **Full Driving License**
-
